SOUTHEAST IOWA LINK (SEIL) Mental Health and Disability Services

Annual Service and Budget Plan for FY'18

Serving Des Moines, Henry, Jefferson, Keokuk, Lee, Louisa, Van Buren and Washington Counties

Mission:

Collaborate with people to provide welcoming individualized and integrated services that create opportunities to improve lives.

Vision:

The Vision of Southeast Iowa Link is to facilitate open, quality and comprehensive services to people with multiple issues in their lives. We strive to be welcoming, hopeful and helpful to people who have complex MHDS challenges, including trauma.

INTRODUCTION

Southeast Iowa Link (hereafter referred to as SEIL) was formed under Iowa Code Chapter 28E to create a mental health and disability service region in compliance with Iowa Code 331.390.

In compliance with IAC 441-25 the SEIL Management Plan is comprised of three parts: Annual Service and Budget Plan, Annual Report, and Policies and Procedures Manual. The Annual Service and Budget Plan includes: local access points, Targeted Case Management agencies, a plan to address prevention, ensuring effective crisis stabilization, a description of the scope of services, projection of need and cost to meet the need, and provider reimbursement provisions. Upon implementation of the initial SEIL management plan, each subsequent year an Annual Report will be submitted as per legislative direction, as well as the Annual Service and Budget Plan.

The Annual Service and Budget Plan has been approved by the SEIL Governing Board and is subject to approval by the Director of Human Services.

The SEIL Management Plan is available at <u>https://southeastiowalink.squarespace.com/</u>, each local SEIL office, as well as on the DHS region website.

ACCESS POINTS

An access point is a part of the service system or community that shall be trained to assist with the MHDS funding applications for persons with a disability. SEIL has designated the county MHDS offices for this function. Also noteworthy for these access points, the commitment of SEIL to provide a no wrong door approach with attention to provision of service that is warm and welcoming, integration focused, multi-occurring capable, and trauma informed.

| County Office Access Points | Address | Phone |
|-----------------------------|------------------------------------------------------------------------------------|--------------|
| Des Moines | 910 Cottonwood, Suite 1000, Burlington, IA 52601 | 319-754-8556 |
| Henry | 106 N Jackson St., Suite 102, Mt Pleasant, IA 52641 | 319-385-4050 |
| Jefferson | Courthouse, 51 E. Briggs, Fairfield, IA 52556 | 641-472-8637 |
| Keokuk | 101 S Main St., Courthouse, 2 nd Floor-Room #23, Sigourney, IA 52591 | 641-622-2383 |
| Lee | 307 Bank St. PO Box 937, Keokuk, IA 52632 | 319-524-1052 |
| Louisa | 117 S. Main (Courthouse) P.O. Box 294, Wapello, IA 52653 | 319-523-5125 |
| Van Buren | 404 Dodge Street, Courthouse, Keosauqua, IA 52565 | 319-293-3793 |
| Washington | 2175 Lexington Blvd. Bldg. #2, PO Box 902, Washington, IA 52353 | 319-653-7751 |

TARGETED CASE MANAGEMENT (IAC 441-25.21(1)g)

SEIL has evaluated interested agencies and made a recommendation to the SEIL Governing Board in regard to the designation of Targeted Case Management (TCM) entities that will offer services to individuals enrolled in the Medicaid Program within the region. As per Iowa Administrative Code 441-25.21(1)g, SEIL TCM designates will offer access to cost effective, evidenced based, conflict free Targeted Case Management.

Additionally, designated Targeted Case Management agencies serving the SEIL region must be accredited by the Department of Human Services and meet the following standards of service as defined in IAC 441:

- Performance and outcome measures relating to the safety, work performance and community residency of the individuals receiving the service
- Standards including but not limited to social history, assessment, service planning, incident reporting, crisis planning, coordination, and monitoring for individuals receiving the services.
- Methodologies for complying with the requirements of sub rule 441-25.21 g which may include the use of electronic recording keeping and remote or internet based training

| TCM Designates | Address | Phone number |
|-----------------------------------|--------------------------------------------------------------|--------------|
| Des Moines County Case Management | 910 Cottonwood, Suite 1000, Burlington, IA 52601 | 319-754-8556 |
| Southeast Iowa Case Management | 1000 W Washington Street, Suite102, Mt Pleasant, IA 52641 | 319-986-5659 |
| DHS Targeted Case Management | 1035 Ave H, Fort Madison, IA 52627 | 319-372-7079 |

SEIL has identified and designated the following providers:

Note: Due to recent events related to changes in Medicaid Managed Care Organization protocols, there may be changes in designation of Targeted Case Management entities during FY18. It appears that for Medicaid beneficiaries assigned to an MCO, the service of Targeted Case Management is transitioning to an administrative cost built into the state of Iowa and MCO contracts. The impact on local service providers of TCM is currently unknown at the time this document was developed and submitted.

CRISIS PLANNING

The SEIL region has expended a lot of time, partnering, and financial investment to develop an extensive crisis service system. The SEIL strategic plan completed in FY16 is the foundation and blueprint to the creation, development, and projected sustainability of the service array deemed essential and necessary to meet the unique needs of our region and local communities, with attention to financial, provider, in kind, and additional resources.

Current basic crisis response provisions; including 24 hour crisis line, 24 hour access to crisis response and evaluation, emergent and urgent care appointments, behavioral interventionist

services, Jail Diversion, CIT, and Crisis Stabilization Residential Services are provided through Community Mental Health Centers and providers as listed below:

| AREA | Location | Address | Phone number |

CRISIS SERVICES

SEIL has invested heavily in the development of stakeholder input, partnering, collaborative efforts, provider competencies, and resource acquisition to address the crisis needs of our communities and counties. We continue to expand and develop those relationships to develop programming and services that are effective and efficient at the local level, but also are mindful of the statewide efforts to develop a MHDS service array that is congruent to the larger system regardless of funding source.

The following is an overview of the strategies for intervention that have been implemented to fulfill that strategic target and address individual need:

- A number of the SEIL outpatient providers of clinical/medical/therapeutic services have contracted for emergency and urgent care appointments in order to facilitate prompt access to service as the situation dictates. Additionally, the region has focused on improving the quality of practice through a multi-dimensional approach to quality improvement. Trainings have been facilitated to staff across the spectrum of services (clinical to community based) for multi-occurring, trauma informed, integrated, strength based approaches that are person centered and stage matched. This will be an ongoing venture with the goal of facilitating competencies/trainings to meet the demands of the roles that all MHDS personnel occupy.
- SEIL has partnered with and contracted for 24 hour crisis line services to ensure individual access to service with connectedness to local clinical oversight. Unique to the SEIL 24 hour crisis line is its integration into a local hospital system that allows for the use of an Electronic Health Record system which further pushes the integration of medical service with behavioral health service.
- Each of the eight counties of the region currently have access to an on-call system in which a licensed therapist is available in person to each of our eight hospitals in the region. A standardized minimum assessment is utilized by each of these on-call therapists to provide consult to the Hospital Emergency Department of which a person is present. That assessment is a combination of a psychosocial evaluation with the integration of the Columbia Suicide risk assessment/rating scale. This assessment is also the access standard for the regions two Crisis Stabilization Residential Services.
- The two Crisis Stabilization Residential Service programs of SEIL have initiated the process of becoming Chapter 24 accredited. The intent moving forward is to improve the services therein, and facilitate financial sustainability thru the development of braided funding for this level of service.
- Jail Diversion has been developed and will be an ongoing service embedded in all 8 county jail systems of the SEIL region. The collaborative effort amongst the SEIL Management team, the local Sheriffs/Jail Administrators, Board of Supervisors, Judiciary, Probation Officers, Clerks of

Court, and local MHDS provider network has been tremendously educational and useful in developing a service system that has demonstrated a positive impact on the various departments and finances of the county/region/state system. The diversion programs were initiated with emphasis on Intercept 3 and 4 of the Sequential Intercept Model.

• Progress has been made in the pursuit of implementation for Intercept 1 and 2 of the Sequential Intercept model. Crisis Intervention Training for local law enforcement has been initiated and several of the partners in jail diversion have attended trainings and been observers of service strategies to address the pre-booking component of Intercept. Included in these efforts are observations of CIT in Johnson County, Saint Louis Missouri, and San Antonio Texas. Other learning opportunities include conversations with authorities of the Law Enforcement Academy, trauma center/triage units for specifically justice involved cases, and grant opportunities to develop trauma informed care within justice involved interventions and for public safety personnel.

FUTURE PLANNING

- SEIL will make effort to continue to educate the public regarding Mental Health and Disability Services with attention to preventative measures i.e. Mental Health First Aid, Suicide prevention, holistic health concepts, etc.
- Continue to facilitate professional competencies for employees within our region service system and provider network. Emphasis will be given to multi-occurring, trauma informed, motivational interviewing/strength based, stage matched, person centered intervention knowledge and skills.
- SEIL will continue to expand on our collaborative efforts across multiple disciplines to best serve our core service populations.
- SEIL will assess, plan, and implement intervention strategies across the continuum of need that is effective and efficient for individuals in need residing in our region given the access to necessary resources and issues of sustainability.
- Efforts will continue to formalize resource inventory into applicable resource guide and begin to make public and market SEIL related information, referral, and resources.
- Continue to conduct a gap analysis/utilization review for crisis and stabilization services.
- Forecast potential obstacles to sustainability that would deter service development
- Continue to develop outcome and value based service array solidified in contractual agreements with region service providers and working with QSDA group to gain some degree of standardization across the regions and state.

- Continue to work collaboratively with Managed Care Organizations to facilitate seamless service delivery to individuals across the array of publicly funded benefits and with mindfulness of the continuity of treatment in the life of each individual served.
- Create a network of care across multiple disciplines (DHS, DOC, Elder Affairs, IDPH, Law Enforcement, Lifelong Links, Vocational Rehabilitation, Workforce Development) to facilitate person centered, multi-occurring capable, evidence/recovery/strength based, integrated, solution focused options in service for individuals in need.
- SEIL will continue to move toward a Value Based Contracting/Performance approach to service development in alignment with CMS guidance.
- Data validation will be commenced via the collection of individual social determinant information in the Community Services Network. Efforts continue to be made to collect baseline data using the provider network for input. Protocols for data validation will be determined on a statewide basis thru the CEO collaborative to ensure uniformity in analysis and validation.

SCOPE OF SERVICES AND BUDGET FOR FY'18

SEIL continues to develop regional service access and array. The FY 18 budget was developed at the local level by the personnel of the individual counties, the county Board of Supervisors that wield taxing authority, and with close attention to the financial obligation of SEIL contracts/mandates, utilization of county resources/employees, DHS Redesign Progress Report and potential legislative changes to the system. SEIL Governing Board members and SEIL Management Team facilitated many discussions on the budgeting process at governing board meetings and at the local level with Board of Supervisors. Recommendations were made as it relates to projected expenditures, levy capacity per current law, and existing fund balances maintained at the local level. The SEIL budget recommendation was to build a \$35.05 per capita expenditure budget as the minimum investment to the region with mindfulness of historical expenditure and future service development in the upcoming fiscal year. The revenue used to build that minimum budget could be derived from fund balance, levy, or a combination thereof as determined most appropriate at the local level by the Board of Supervisors in each county. The allocation of fund balance into the expenditure budget demonstrates a good faith effort on the part of SEIL/member counties to develop service while simultaneously reducing property tax asking and spending down fund balance responsibly. This again did not occur without controversy at the local level as the perspectives are varied on the issue either as a property tax reduction issue, revenue reduction issue, service development issue, or impediment to home rule issue. There is also much discussion about the unequalized nature of the current levy capacity between member counties and how that issue may contribute to redistribution of locally derived property tax dollars to supplement other member counties with lesser levy capacity. This is a controversial topic and one that needs to be resolved to facilitate the sustainability of the region system.

SEIL's mission is to collaborate with people to provide welcoming individualized and integrated services that create opportunities to improve lives. These services will be in the least restrictive environment to meet individual need and will be guided by conflict free clinical assessment and care coordination. Olmstead: Community Integration for Everyone will be a driving principle in ensuring individuals receives-the most appropriate level of care services to meet their needs. SEIL will strive to be welcoming, hopeful and helpful to people who have complex MHDS challenges, including trauma. Furthermore, as indicated in the SEIL Management Plan, it is our objective to develop a system of care approach that is characterized by the following principles and values:

- Welcoming individualized and integrated services
- Provide access to comprehensive need based services
- Person centered and family driven
- Being able to sustain a quality of life in the community of choice
- Recovery/resiliency oriented
- Trauma-informed
- Culturally competent
- Multi-occurring capable

SEIL shall be responsible for funding only those services and supports that are authorized in accordance with the process described in the SEIL MHDS Management Plan, within the constraints of budgeted dollars and per legislative direction. SEIL shall be the funder of last resort and regional funds shall not replace other funding that is available, nor shall it supplement other forms of public benefit for "same service." An individual who is eligible for other privately or publicly funded services and supports must apply for and accept such funding and support and comply with requirements to remain eligible for such funding and support.

Below is the scope of services. As indicated in the newly approved amended SEIL MHDS Management Plan, the standardized functional assessment (as indicated in Iowa Code 331.396 and determined by the Director of Human Services in consultation with the state commission) must support the need for services of the type and frequency identified in the individual's case plan. The number indicated under target populations and additional population is a projected estimate of numbers served in each of the priority service areas that are funded via the region.

| Core Domains (IC331.397) | Description | Target Pop. MI/ID | Add'l Pop. | Access Standards |

| ransportation | vocational programs. | 0,0 | 0 | |
| | | | | Individuals will be encouraged to use their personal |
| | | | | funds to acquire transportation, which is made |
| | | | | available to the general public/community at a |
| | | | | discounted rate via regional transit authorities (i.e.: |
| | | | | personal needs account fund to purchase monthly |
| | | | | bus pass/transportation). |
| | | | | (May be reflected in Program cost) |

Note: The numbers reflected associated with diagnosed target populations, captures a projection of regionally funded individuals- unduplicated. MHDS Regions across the state have not been authorized to view Medicaid funded unduplicated counts of individuals served, nor do they have access to any other public or private third party payer information. Additionally, SEIL is in process of identifying best practices in reporting data which will have influence on future data counts related to Chart of Account Codes and services. The current population base of the SEIL region is 163,588 as per the 2015 US Census.

County, regional, private third party payment and state funding may be a resource or funding mechanisms for some of the above identified services. SEIL will continue to request information and to assist in identifying funding structures (including regional service expenditure funds) that will work congruently with each other to derive successful outcomes for individuals served. MHDS regions are considered a gap filler of services for eligible individuals and services that can compliment and reduce expenditure of the Medicaid service array. It is imperative and the objective of the SEIL region to ensure that funds from multiple sources be blended when possible to provide effective, efficient, and sustainable service to the core service populations of the region. The designated functional assessment tools will direct the level of care need and individualized treatment services required to facilitate integration and independence as per the direction of the Olmstead Plan. At present the Supports Intensity Scale (SIS) is the identified assessment tool for individuals with intellectual and developmental disabilities and the Inter-RAI is used for the other populations of HCBS waiver services. It is with some difficulty that these assessments can be secured for individuals due to lack of capacity in the professional implementation of the assessments. SEIL works with its contracted network of providers to gain access to these assessments and in its absence adheres to the clinical and professional treatment provider guidance. This is a strategy that the SEIL region will continue to pursue so to reduce duplication, decrease financial cost, and ensure that the system is not re-traumatizing or increasing anxiety of individuals by asking them to tell their personal stories repeatedly or routinely subjecting them to a litany of questions that have already been collected.

Projected Region Fund Balance Total as of July 1, 2018: \$8,949,075

FINANCIAL FORECASTING

SEIL uses historical internal accounting and service data from the regions data warehouse and various other queries, in addition to external market and economic indicators from other comparable sources to engage in financial forecasting. FY18 is presenting to be a complicated projection as there are multiple driving factors in change to the region service system. Anticipated sources of change include: federal repeal and replace of the Affordable Care Act, modifications in payment structure for Medicaid (block granting), modifications to regulatory oversight of publicly funded services, modifications to the Iowa state plan, MCO contract variability as well as financial viability of each of the MCOs, availability and financial health of providers of MHDS services, legislative changes to MHDS region funding, political philosophy in orientation and implementation of local resources related to MHDS, and variance of strategy at the direction of the regions Governing Boards/member county Board of Supervisors.

SEIL has engaged itself in processes to mitigate risk pertaining to many of the above mentioned complicating factors. Currently, there is movement to once again modify the 28E agreement to allow for additional opportunity to pool funds specifically as it relates to SEIL contracts for service so that services will be equally distributed across the entirety of the region and financial obligation for the collective array of service is accounted for in its entirety. The management plan has been updated to reflect a service matrix that is cohesive with the Medicaid service array for the core populations and allows for braided funding for many of the newly developed services. Use of eligibility and non-eligibility based services allows for common sense approaches to individual's service assistance that has financial as well as capacity implications to the larger system of care. Finally, SEIL has actively participated in speaking engagements and partnering opportunities with the public and other service systems/disciplines to diversify information and practice.

Throughout the year the SEIL Governing Board, Management Team, Advisory Board, Change Agent Team and local stakeholders will identify unmet needs and areas for service improvement and development via the strategic plan process. Any service development will take into account the needs of the region residents, the availability of resources (financial, capital, and personnel) and legislative action that will have implications for the SEIL strategy in meeting and maintaining the needs of the MHDS population.

PROVIDER REIMBURSEMENT PROVISIONS

Each service provider shall provide monthly billing invoices and other information requested of the provider for utilization review. The monthly billings shall include the following information:

- Name and unique identifier of each individual served during the reporting period.
- Number of units of service delivered to each individual served.
- When requested, attendance records.
- Unit rate and total cost of the units provided to each individual co-payment or other charges billed to other sources shown as deductions on the billing.
- Actual amount to be charged to SEIL for each individual for the period.
- The invoice must contain the provider name, address, invoice date, invoice number and signature.

SEIL staff shall review the billings and additional utilization information in comparison with service funding authorizations in place. Services billed without service funding authorization shall be deducted from the billing.

All eligible bills shall be submitted no later than 60 days after the month the service was provided. Submitted invoices shall be paid according to the County Auditor claim cycle. This should usually occur within 60 days of receipt of the bill unless unforeseen circumstances exist or additional documentation is required. No billings received more than 60 days after the close of the fiscal year in which the service was provided shall be considered for payment by SEIL unless there is a statutory obligation. Fiscal year for SEIL is July 1 – June 30.

SEIL uses a mix of fee-for-service, and capitated case rates for most of its services. It provides per capita contribution for negotiated rates only for specific population based activities where billing by individual served is impossible or impractical.

SEIL intends to partner with the Department of Human Services/Managed Care Organizations to help incorporate all sources of funding including medical assistance program funding, so that a person can receive benefits conducive to a whole person approach to health and wellness.

SEIL service contracts require that all providers meet all applicable licensure, accreditations or certification standards; however, SEIL will make serious efforts to stimulate access to more natural supports and/or non-traditional providers in its service provider network. Successful attainment of positive outcomes, individual and family satisfaction, cost effective measures are the most important factors in continued network participation. SEIL has identified access points

within each county of the region congruent with the physical location of that county's disability service coordinator to assist individuals or their representatives to apply for services.

SEIL has identified the following providers currently contracting and/or in business association with their respective host county and have shared their interest and intent to work with SEIL. Additional providers may be added throughout the year as services are developed to meet the continuum of service needs of individuals. Additionally, there are numerous agencies working diligently within our eight county region serving individuals with disabilities and their families without SEIL funding. SEIL will continue efforts to reach out to all agencies for input and involvement in planning as we all work toward the common good and goal of facilitating growth and opportunity for people with disabilities in their communities.
